June 1, 1972

Carl W. Dabelstein
Lincoln, Nebraska

This is to verify your reception of our signal on February 17, 1972 from 5:44 to 5:45PM Central Standard Time on 1590 kcs.

Your receiver is one I am famikiar with, having one in the family for some years.

Thought you might like to know we are broadcasting from a 98 foot tower but with a unipole set up. Works real fine with a full 100 ohms resistance at the base of the tower. Before we bought the station it has a base resistance of just 16 ohms. The transmitter is an old model Gates but right now I wouldn't trade it for a new one.

Sorry about answering your verification but somehow it was lost in remodeling our offices.

Yours truly

Jerry Grojean, Partner
General Manager.
