Lincoln, Nebraska 68507

5 Feb 1976

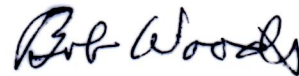

Dear Carl,

This is your verification of reception of this station on 2 February 1976, 2:10 to 2:16 AM.

Station was on the air from 0200 to 0216, with ID's and test tones of 400 Hz and 1000 Hz alternating, with some recorded music while I was answering the phone for members of your club who either couldn't hear it, or wanted to report a very good signal.

Thanks for the reports, will be happy to do the tests again at some later date.

Sincerely,

R. L. Woods

Chief Engineer
