## VERIFICATION OF DX REPORT

Dear Carl

November 14, 1979

This is to verify your reception report of WVMI on Nov. 12 at  
12:25 C.S.T.

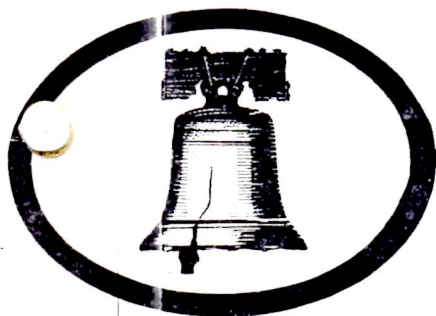

WVMI operates on 570KHz with a daytime output power of 5000 Watts and a nighttime output power of 1000 Watts.

The antenna consists of a 4 Tower Array for daytime operation and a 4 Tower Array for nighttime operation. Each tower is 400 feet high. The location of the transmitter site is 7.5 miles Northeast of Biloxi, Mississippi. Thank you for your report.

Sincerely,

*Bob Thornton*
