Dear Sir:

In reference to your letter of Dec 10th, I am pleased to verify reception of KARR on this date and time.

We were making engineering tests at that time and also conducted a frequency check at 220am EST. Our frequency check is taken by Commercial Radio Monitoring in Lee's Summit, Missouri. They read our signal that night very clearly so we must have been skipping just perfect into that neck of the woods.

Thanks for your interest in writing and letting us hear about your reception of KARR. Our power that night was one kilowatt.

Sincerely,

E R Kukkola, C. E.
