SERVING THE CAROLINAS HEARTLAND

P. O. BOX 529 — LAURINBURG, N. C. — (919) 276-2911
5000 WATTS — A CURTIS RADIO STATION

Carl W. Dabelstein
8209 West 78th Street
Overland Park, Kansas 66204

Dear Mr. Dabelstein:

Steve Poole is no longer Chief Engineer for WEWO. Since he left another engineer has come and gone. I found your letter in the piles of paper on the desk about four weeks ago. Today I was able to find proof that we were the station you received on February 23, 1976. Dave Bennett, who was the engineer at the time of the test kept a file on all the reception reports he received. Your first letter is not in the file, it ~~must~~ have gotten lost in the mail. Your second letter is in the file however. Since the file is labeled "Reception Reports - Answered" he must have written you a letter. Either it got lost before it got to the mailbox or it got lost in the mail. I've noticed that the address on your last letter is different from the one on your second letter. Maybe he sent the letter soon after you moved. Not having all the facts I have no way of knowing for sure. I do confirm your reception report on the basis of records from that time.

WEWO is owned by Curtis + Associates who acquired the station in 1969. The station first signed on in 1947 as a 1000 watt daytimer. In 1965 authorization to operate at 5000 watts during non-critical hours was obtained from the FCC.

Our transmitting equipment consists of a 1947 Raytheon RA-1000 transmitter which was used full time (when on the air) when you received our test. It is now used only on Sundays when we're on low power, and as a stand-by when our new transmitter cuts out, which is not very often. We now use an RCA BTA-5H.

Enclosed you will find a reception verification card.

Yours truly,
Sabrina D. Raley
Chief Engineer, WEWO
