Omaha 44, Nebraska

Hi Carl,

This is to confirm your reception of this station on
12/28/61, between the hours of 0830 to 0840 CST.

K7SBV, huh? Thought you would be out chasing DX on the ham
bands.

I have just gotten back on the air after several years
away from it. Have BC-610 transmitter, generally about
440 watts on 80 meters. The receiver is a home made
front end and IF strip, with a Hammarlund HC-10 SSB adaptor
as the tail end.

Sincerely yours,

Gerhard Pietsch

Gerhard Pietsch, W0ZPX
Chief Engineer.
