Mr Carl Dabelstein
12524 C Street
Omaha 44 Nebraska

Dear Mr Dabelstein:

Thank you kindly for your report on the reception in Omaha of our signal. Please consider this letter was a verification of your reception.

I note that you are KØSBV. It might interest you to know that I myself am WØYYV and that my wife Dorothy is KØUOK. We operate the S/line barefoot all bands though as you know 10 and 15 meters aren't too good at the present time. We have the Hy Gain Thunderbird(Th 4) beam for 10-15 and 20. For 40 and 80 meters we used a dipole fed with 450 ohm open line in the center.

Perhaps some of these days I will be able to QSO you on the ham bands.

Most sincerely

John Townsend KJLT
