3300 North 56th St.

SUBJECT Verification of reception

Lincoln, Nebraska 68507

We thank you for your report of reception on the morning of May 20th.

At the time you heard our signal we were radiating 1000 watts non-

directional, using a Collins 820D-1 Transmitter. Except for the

final R-F amplifiers and modulators, (which are 5-500's) the transmitter

is completely solid state.

SIGNED

Donoghue W. Tyler, CE (WSPOR)

Our frequency was measured at the time as being 0.6 Hz low from 1230 KHz.
