LINCOLN, NE 68507

Dear Carl,

It gives me great pleasure to confirm you reception report of our test on Feb 11 1974. I am sorry the QRM was so bad that particular morning. We were putting in a consistant S 5 to 6 in So California with slight QRM and very slight QRM from KYXI in Oregon. Paul Hart reported from Ft Worth that we were occasionally blocked by a Baranquilla Columbian station. Some ship!

For your info, we operate remote from the above location with our X'mitter about seven miles west in the middle of an alfalfa field 200 yards from the Rio Grande River. Our transmitter is an RCA BTA-1R operating at 500 Watts into a 99' shunt fed antenna with an impedance of 121 ohms.

Thanks again for your report.

Very truly yours,

*Donald W. Flaig*
