

Good Morning Mr. Dabelstein:

Your most refreshing letter arrived recently. . . . if not for the busy Christmas season, I would have answered sooner, but alas the radio business has kept me quite busy.

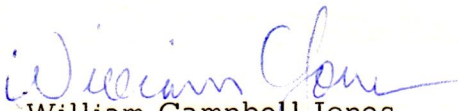

This will verify the correct logging for KWKA monitored on your receiver on December 21, 1971 and subsequently submitted to us for authentication.

Yes we are a recent addition to the New Mexico Broadcasters organization. . . our AM went on the air August 1, 1971. It might interest you to know that both KTQM-FM 99.9 mhz 50,000 watts and KWKA 680 Clear Channel 500 watts directional are totally automated. Our stations are operated entirely from computers. I believe we are the second such facility in the Country, the other that of an organization in Provo, Utah.

I am enclosing some materials that might be of interest.

Any additional information or assistance i might provide will be forthcoming upon request.

Best,

  
William Campbell Jones  
Operations Manager  
Norman Petty Stations

Mr. Carl W. Dabelstein
