Dear Carl,

This letter will verify your reception of KLUC-AM, with 10,000-watts of power, from Las Vegas, Nevada, on Monday, January 17, 1972, between the hours of 12:12 A.M. to 12:17 A.M. on 1140 khz.

Your report is entirely correct. The unidentified test tone was audible here prior to test time. I believe KRAK was not programming, so it may have been them.

KLUC-AM conducts frequency checks the first Monday morning following the 15th of each month, in case you or a friend may wish to tune in. And you are most welcome to visit us when in our area.

Many thanks for your report, and your interest in KLUC.

Radio-actively,

Keith Stewart
Music Director
