Box 74 • Long Island, New York 11746 • (516) 423 6740

January 27, 1977

Mr. Carl W. Dabelstein
8209 West 78th Street
Overland Park, Kansas 66204

Dear Carl:

This is to confirm your reception of WGSM Huntington, New York on December 20, 1976 from 0221 to 0230 EST. WGSM operates on a frequency of 740 KHz with 5000 watts of power feeding a directional array, having it's major lobe toward Eastern Long Island. During critical hours of possible interference, WGSM operates with 1000 watts non-directional.

I wish to thank you for your report since it does assist in determining the quality of WGSM's signal.

Yours truly,

Alan D. Kirschner, WA2UCV
Chief Engineer
