Mr. Carl W. Dabelstein  
3300 North 56th Street  
Lincoln, Nebraska 68507

Dear Carl,

Thank you for your fine report of reception during our recent test broadcast. I am happy to congratulate you for being the most distant DXer reporting this test, and I am very pleased to verify your reception of WPUT radio, 1510 kilohertz, on Monday morning February 10, 1975 between 2:10am and 2:18am E.S.T.. During this time, WPUT was operating with its regular daytime power of 895 watts. We have a single tower, 140 feet high, located right outside our studio and office building, about 3/4 mile north of the downtown area of the village of Brewster, New York.

Nice going on hearing us out in Nebraska! Sorry for the delay in answering, but we heard from a total of 72 DXers as a result of this test, and it takes some time to get the verifications out. We are quite pleased with the results of this special program.

Best of DX,

*Chris Lucas*
