PRYOR, OKLAHOMA

L. L. GAFFANEY  
MANAGER

Feb. 11, 1962

Carl Dabelstein  
12524 C Street  
Omaha 44, Nebraska

Dear Sir:

While your letter of Feb. 9 did not state what day you heard us, there is no doubt that it was us as we always sign off with the latest five minutes of news and weather and our sign-off announcement includes the name of the company which I own, which in turns owns KOLS. We also sign on at 7:15 a.m. because we are on a Mexican clear channel.

Incidentally, I don't know what has happened to the big Mex XERF. He don't get into the US like he once did or he's off completely. He causes is little trouble any more. I understand on good authority that he's having financial difficulties and it couldn't happen to a more worthy fellow, either.

We perform our frequency measurements eacy third Monday morning at 5:45 a.m. Commercial Monitoring in Kansas City measures our frequency. If you get up March 19, 1962, about 5:45 a.m. you can probably hear us. Program is a 1,000 cycle tone with station identified every two minutes. Lasts for only 15 minutes--until 6 a.m.

Very happy to have had you hear us. We've got lots of reports from as far away as Key West, Fla.--Bellingham, Wash., Haverhill, Mass., and several central and eastern Canadian cities.

Sincerely yours,

*L. L. Gaffaney*  
.....  
L. L. Gaffaney, Gen. Mgr., Chief Eng.  
KOLS, Pryor, Okla.
