

August 27, 1987

Mr. Carl W. Dabelstein  
8209 West 78th Street  
Overland Park, Kansas  
66204

Dear Carl:

Thank you for your letter dated August 18, 1987. I apologize for not responding to your letter dated October 12, 1983. Although I was not working here then, based on the information contained in your letter, I will confirm that it was CFGM 1320 that you received.

For your information, CFGM operates on a frequency of 1320 kHz with an output of 50,000 watts into 13 towers of differing heights. The standby transmitter operates at a reduced power of 10,000 watts. The main transmitter is a Continental 317C2, while the standby is an older Gates model. Because we have two different transmitting powers (50,000/10,000 watts), we are classed as a DA2 station. The towers are located at Latitude 43-34'30"N, Longitude 79-41'05"W.

CFGM has been on air since 1957 and was Canada's first full-time country music radio station.

Best regards,

Lois Skillen,  
Secretary to the  
General Manager
