

P.O. 908 / Franklin, Pa. 16323 / 814-432-2188

<ml>

Thank You for listening March 21, 1981. We had transmitter problems at 8:40 am on WFRA-am. This forced us to use the Standby transmitter at 250 watts.

Murphy's law prevailed again, however, WVEN remained at our full power of 3000 watts.

We will plan another test next winter and hope the regulations in the transmitter will not exclude.

Enclosed you will find more information on WFRA/WVEN Franklin, and you are invited to visit us when you are in the area.

CONFIRMATION

WFRA-AM 1450 KHz 1000 watts _____

WFRA-AM 1450 KHz 250 watts 212 AM _____

WVEN-FM 99.3 Mhz 3000 watts _____
