Carl W. Dabelstein
3300 North 56th Street
Lincoln, Nebraska 68507

Dear Mr. Dabelstein:

Thank you for acknowledging reception of KKAA radio on June 24, from 12:15 AM to 2:03 AM. We sure appreciate hearing from radio club members to find out what our signal strength and interference is at great distances, such as Lincoln, Nebraska.

KKAA radio will be signing on the air in a matter of weeks at 5,000 watts with a brand new 24-hour country music AM. On the morning of your reception of our station we were performing course tuning of our phasor at a reduced power of 1,000 watts. Once we become operational at 5,000 watts our signal will be directional North and South.

Once again, we appreciate hearing from you and hope you will keep in touch concerning any changes in our reception in the future.

Please accept this letter as our QSL card for your posting purposes.

Sincerely,

Jean B. Laustsen
Operations Manager
