Mr. Carl Dabelstein
3300 North 56th St.
Lincoln, Nebraska 68507

Dear Mr. Dabelstein:

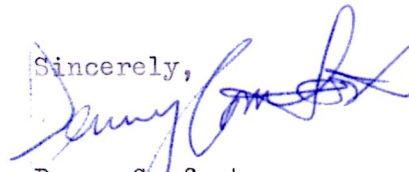

Yes, KMSD did test for equipment and transmitter faults on January 16, 1975. We also tested on February 24, and are again testing this morning, March 19.

Just yesterday we received some word on our final broadcast license from the FCC, and we expect to begin regular broadcasting quite soon.

Let me apologise about your first letter, but I didn't arrive here until after the January testing was completed, and in fact, did not go on the air testing until the 24th of February.

Thankyou for taking the time to write and let us know that we were received in Lincoln, I hope we can do it again.

Sincerely,

Denny Comfort,
Music Director
