Dear Sir:

This will confirm our testing measurements Jan 15, 1973 on 1490 Kc. We were checking frequency with Nan Nostra in Decatur, Alabama. We were exactly on frequency 1490,000 We test every third Monday Morning ^{of the Month} from 2:00-2:45 + from 2:30-2:45 AM CST if you wished to try again. I received 3 others letters from, Martin Jerry, Ohio + Karatogo, Florida. Our (small) station appreciates the time you took to write. Hope to hear from you again.

Thanks,
George Moore
