Lincoln, Nebraska

Carl:

This is to verify your reception of WGNS on 15 October 1973. Your log is quite accurate, and I am pleased to confirm your reception.

It's interesting DX, because we operate 1 kw daytime, and 250 watts at night, which is the same as KLWW in Cedar Rapids. Our transmitter is the reliable Gates BC-1T. WGNS is affiliated with the Mutual Broadcasting System.

We are presently rebuilding our main studio. Murfreesboro is about 30 miles southeast of Nashville; if you're ever in the vicinity, please stop by!

Sincerely,

*al*  
Albert A. Allenback, Jr.  
Asst. Engineer/WGNS
