Dear Carl,

This letter is to confirm your reception of KAAM Radio
on August 31, 1978 at 5:47A CDT.

KAAM operates on 1310KHz with 5 kilowatts directional nighttime,
and 5 kilowatts non-directional daytime.

Our transmitter is a Collins 828E, the standby a Continental 315C.

The antenna system consists of two, self supporting, insulated,
vertical radiators, with an overall height of 202'.

Thanks for writing.

Happy DX'ing,

Neal Peden
Supervising Engineer
