Carl W. Dabelstein  
3300 N. 56th St.  
Lincoln, Neb. 68507

May 9, 1972

Dear Mr. Dabelstein:

This is to confirm your reception of KCAD on March 11, 1972.

KCAD is a "daytime only" station operating on 1560khz, which is, as you know, a clear channel frequency. We have a power output of 500 watts.

At the time of your reception of our signal, we were performing our "Proof of Performance" measurements. These are required of us by the Federal Communications Commission. They are performed on an annual basis.

We are pleased to have your report and will add your letter to our Dx file.

I am enclosing our rate card, coverage map, and blank survey sheet. I hope you will find these items interesting.

Thanks again for your report, and I'm sorry you had to write us twice. Sometimes these things do not get into my box as they should.

Yours truly

James R. Grant  
Ch. Engr.
