

KINE

1000 WATTS AT 1330

KPUP

STEREO AT 97.7

May 24, 1973

Carl W. Dabelstein
Lincoln, Neb.

Dear Sir:

Thanks for your reported reception of KINE on May 20th. We were on the air at the times mentioned in your report making our monthly frequency check with our frequency measuring service in Austin, Texas. Our frequency measuring service is Southwest Frequency Measurements, Inc.

When we are making a measurement, we modulate our transmitter with a 1000 hz tone and interrupt only to make station ID's. We are a 1 kw daytime only station (non-directional).

Thanks again for reporting reception of our signal in Lincoln.

Sincerely,

R. J. Whitaker

R.T. Whitaker, CE
