FIRST AND MOST POWERFUL in odessa, texas

Jan 28, 1971

Carl W. Dabelstein
1924 South 55th
Omaha, Nebraska 68106

Dear Carl,

Many thanks for your reception report of January 16, 1971 from 1:24 am to 1:30 am. I am pleased to hear that we are received in Nebraska.

KRIG operates directionally from local sunset to local sunrise, with one kilowatt power. Our two tower array radiates a "figure eight" pattern with the major lobe of the eight oriented a few degrees to the East of true North. The nulls in the eight are positioned to protect stations in California and Alabama operating on 1410 kHz. The minor lobe radiation is diminished to protect a Mexican station. Our daytime power is one kilowatt non-directional using only one tower.

I am enclosing one of the bumper stickers that was mentioned on my program.

Thanks again for taking the time to report and best wishes for continued good listening across the band.

Sincerely,

John F. Bagwell
