Carl W. Dabelstein  
3300 North 56th Street  
Lincoln, Nebraska 68507

Dear Carl:

Thank you for your reception report of KTEM on March 31, 1975. Your report was correct in every detail and we are most prompt in confirming such reports of dx reception.

KTEM operates on 1000 watts day and 250 watts nighttime with a 5/8 wavelength non-directional antenna.

In all my 2-meter transmitter hunting with "secret weapon" antennas I have long since wanted to extend this interest into building a good directional loop type antenna for the broadcast band. Like yourself, one of these days I'm going to make it! Thank you Carl.

Sincerely,

  
Charles R. Schlieper  
Chief Engineer, KTEM
