Dear Sir:

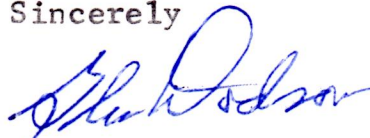

I received your letter this morning concerning the reception of the KTXJ radio signal during our monthly frequency measurement Monday, May 15, 1972.

According to the information received, I can confirm your reception. I did broadcast a test tone at that period of time, with breaks for station ID every three or four minutes.

We make our frequency check monthly on the third Monday at 5.30 a. m. CDT. We also make our FM frequency check the same day and time but no tone is used. Only a station id at 5:30 a. m. and 5:45 a. m. is given. We broadcast on 102.3 mc.

Again, thank you for your letter and I hope to hear from you again.

Sincerely

Glen Dodson
Chief Engineer & Station Manager
