

WOHN 1440

27 March 1979

Mr. Carl W. Dabelstein
8209 West 78th Street
Overland, Kansas 66204

Dear Carl,

This will confirm your monitoring report of 20 March 1979. We were indeed on the air conducting equipment tests and were modulating with a one kiloHertz tone for frequency calibration at the time indicated.

Your report is appreciated - it is nice to know that our station is heard well so far from our primary listening area.

For your information, W O H N is a one kilowatt daylight station operating into directional antennas favoring transmission west of this location - some twenty miles from Washington, D.C. Our format is adult contemporary music with hourly news broadcasts.

Thanks again for your report. GOOD LISTENING!!

Sincerely,

Richard E. Sanderson
