Dear Carl,

This is to acknowledge receipt of your letter dated 24 April, 1989 and your reception of our station transmission. We are transmitting on a 5 element vertical mounted 170 feet above a ground level of approximately 225 feet. The transmitter was a 10 KW Harris which has now been replaced with a Harris Ht 20-FM driven by an Optimod stereo generator. The antenna has a gain of approximately 3.65 db. Our current hours of operation are from 6 am to 7 pm PDT with occasional over runs to 10 pm for Dodger baseball games. The station has changed management which may account for the loss of your letter. Thanks for the report and 73s.

Ron Rounds
Chief Engineer
