

August 9, 1989

Dear Carl:

Congratulations on your reception of KGLS on 8/5. Your reception detail is inaccurate in just one respect: Paul Harvey starts at 11:10am - but after all, what's one minute between friends?

How was the reception? I take from your report that it was continuous through the 25 minutes. I'm quite interested in what you thought of the quality of the signal, and if possible, your thoughts concerning the audio ("sound") of the station.

By the way, our transmitter is located approx. 20 mi. Southwest of Hutchinson (4 mi S. of Plevna, to be exact). Our signal commonly reaches Salina and Newton.

Technical details: 100 kW, ERP

Coordinates: $37^{\circ}55'50.0''$ N
 $98^{\circ}19'4.0''$ W

Antenna height: 290.0 m, above ground
822.0 m ASL
307.0 m, HAAT

Happy DX'ing!

Scott Teraat
