Carl:

Thank you for your letter dated August 25 about your reception of KZXL. I have looked at my logs and I find that you are correct with your report.

It is always interesting to hear from areas outside of our normal broadcast area. We have received reports from as far away as Florida.

We are a 100,000 watt FM with our antenna mounted on a 1,000 foot tower. This gives us the ability to cover a large portion of Kansas. In fact, we probably cover more of Kansas than any other station in the state. We are proud of that fact.

I have enclosed a couple of informational sheets. We don't have any bumper stickers or I would send a couple of those too!

Have a terrific day!
