Dear Carl,

I recieved your letter of reception of KDKD-FM on June the 9th. From reading your letter I was able to instantly confirm you did recieve the station because of the first two commercial announcements you mentioned. The third one you said was a Gibson shoe sale didn't ring a bell. But when I checked the log I found we ran a spot for Vincents shoes which some of their commercials I have a hard time understanding on the air right in town.

It makes me happy that you were able to get the station in your part of Kansas City as we have some local areas that say they can't pick it up. I can use your letter to disprove them. What does surprise me though is that you got our signal and KSKT Wamego at all as you are close to KCPW on 94.9Mhz. in Kansas City. We have a hard time with their signal overpowering ours and people just missing us by getting them.

I am enclosing a couple of our bumper stickers and a coverage map for you. Once thanks for the letter and have fun DXing.

Yours truly,

  
Charles J. Branscombe  
Chief Engineer KDKD AM/FM

P.S. If you want a real challenge try for a long distance fm reception from a couple of states away. It may be hard to believe but I got a letter a couple of years ago saying they heard our FM station at 7:15am one morning. The listener was in Pittsburg, Pa. And I personally got not only our station but all the KC satations on my car radio about 110 miles south east of us. I was high on a mountain though. Once again, thanks for the letter. CB
