Overland Park, KS 66212

Dear Sir,

This letter verifies your reception of KEZK on February 8, 1991. Thanks for your letter.

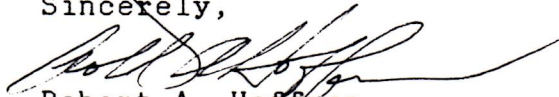

KEZK FM operates on 102.5 MHz with 100,000 watts at approximately 1000 feet, as part of a "Community Tower" system, sharing tower and antenna with five other FM stations.

KEZK (AM) is on 590 KHz with 1000 watts full time, with day and night directional patterns, both of which favor the St. Louis area.

We regularly receive cards and letters from outside our immediate listening areas.

Again, thank you for your interest in our stations and for taking time to write.

Sincerely,

Robert A. Hoffman
