

July 1, 1988

Mr. Carl W. Dabelstein
KØSBV
8209 West 78th Street
Overland Park, KS 66204

Dear Mr. Dabelstein:

Thank you for your letter of June 28, 1988, reporting reception of KLDZ on June 28, 11:24-11:25 A.M.

We have confirmed the information you provided against our program logs.

KLDZ switched from 95.3 MHz, 3,000 watts ERP, 95 feet HAAT to 95.1 MHz, 50,000 watts ERP, 287 feet HAAT on May 25, 1988.

This change in facilities may account for the fact that this is the first time for your receiving us. We have heard from a number of people in your general direction (though not quite as far away) since our power increase.

Further plans are in the works to increase HAAT to 565 feet in the future.

Thanks for your reception report.

Sincerely,

A handwritten signature in blue ink, appearing to read "Lee Thomas", with a long horizontal flourish extending to the right.

Lee Thomas,
Operations Manager
