Dear Sir:

Received and confirmed your Reception Report.

Just a little background on WBLK-FM: We program Top Forty Soul Music twenty-four hours daily.

Our antenna is composed of five (5) horizontally polarized bays which are side mounted on the superstructure of the Rand Building, located in Downtown Buffalo, New York. The antenna faces NNW at a height above ground of 412 feet ("height above" means sea level 1032 feet).

The transmitter is a Gates Model FMS10B which provides an output of 10KW. The antenna gain is five (5), giving us an E.R.P. of 50,000 watts.

We were pleased to receive your report. Thanks for writing.

Yours truly,

WBLK-FM BROADCASTING 93.7 MHZ
