

Your Country Connection

September 30, 1987

Mr. Carl W. Dabelstein
8209 West 78th Street
Overland Park, Kansas 66204

Dear Mr. Dabelstein:

Thank you for your interesting letter regarding your reception of our FM signal on September 6, 1987.

We are always happy to verify reception reports from such distances. Over the years we have received many reports from coast to coast within the continental United States and many points in Canada.

KXXY-FM stereo operates on a frequency of 96.1 MHz with 100,000 watts effective radiated power using a circular polarization antenna system mounted 1,170 feet above average terrain and fed by a Harris FM 40K transmitter.

We also operate KXXY-AM stereo on 1340 KHz, with a full time power of 1KW, non-directional.

Best regards,

Paul Cinnamon
Chief Engineer
KXXY-AM/FM
