

# Caribbean Beacon

P.O. Box 690 □ Anguilla, West Indies

May 13, 1981

Ben Dangerfield  
202 Governor's Drive  
Wallingford, Pennsylvania 19086

Dear Mr. Dangerfield:

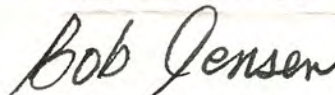

This will be just a brief note to confirm and verify your reception of the Caribbean Beacon described in such wonderful detail in your program description of April 27, 1981.

It surely was good to hear from you in Pennsylvania. This almost completes our receipt of regular reports from all East Coast States as well as numerous reports from the Toronto, Canada area. In addition, our company president listens regularly in Columbus, Georgia.

Enclosed you will find a Brochure describing the Beacon. All the information is correct with the exception that we are still operating on low power (15,000 watts on each XMTR) on both 690 KHz and 1610 KHz. At this point the Gov't does not have enough generating power for us to go to 50 KW.

We have 2 CSI Transmitters and a 350 foot allied tower. This week we added a little 100 watt FM station at 100.1 MHz and we hope to add a TV station this fall. If you happen to hear us on 690 KHz we would be happy to hear from you again.

Appreciatively,

Bob Jensen  
General Manager
