Dear Sir,

Many thanks for your reception report made up after listening to Radio Antilles on October 14th. This kind of information is very useful to us.

It is not surprising that you are unable to pick up our station regularly seeing that the northern limits of our coverage area coincide roughly with the Florida state line, and that there are many stations in your area operating on 930 Kilocycles.

Enclosed herewith is a copy of our coverage map together with an information brochure on the station.

Yours sincerely,
