Dear Mr. Dangerfield,

thank you for your reception report which is being officially confirmed by the card attached hereto.

Your report has called our attention to the fact that RIAS is now also to be heard over in your country on the medium wave frequencies 854 and 683 kcs. This is of special interest to us as thereby we get to know the effect of the medium wave transmitters, which have just recently been amplified.

Hitherto, the reception, if any at all, was possible only on the RIAS short wave frequency 49,96 m = 6005 kcs.

We are taking this opportunity to enclose a booklet on the birth and tasks of our station as well as a schedule.

Looking forward to further reception reports, we remain

Yours truly,

R I A S
BERLIN
