Mr. Ben Dangerfield.,  
Chester, Pa.,  
USA.

Dear Mr. Dangerfield:

Received here at Radio Universidad your reception report on reception of the especial DX program we've aired on the 13th.

The items you've logged agree in time and type, so -- is possible to verify your reception. This our QSL. Sorry XEXQ does not issue QSL cards.

I think Mr. Dangerfield the program was successful by itself, but conditions was ( or were?) not first class, also that test carrier. Ev Johnson says me if it's possible to put a new DX program in December. Of course this may be possible. XEXQ Head is a former pupil of my University class of Electricity, all the staff are friends of mine, and myself in other times, 1957-58 had a scientific news program.

Many thanks for postcards, don worry for not writing, and excuse me my worse typing, but I've had a little a injuring in 3 tip fingers.

Thanks for your attention and your interes in operation of my Alma Mater station.

Sincerely Yours
