Dear Ben,

This will confirm and verify your reception of Radio Ecuatoriana on 855 kilocycles on December 14, 1963. All the information contained in your fine report is correct.

Radio Ecuatoriana now transmits on a frequency of 860 kilocycles with an antenna input of 5,000 watts. The frequency was changed from 855 kes. due to interference from a powerful colombian station which operates on 850 kes.

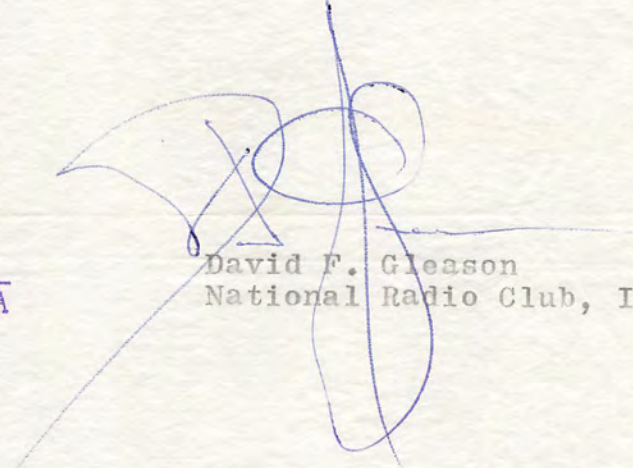

We remind you that an english program, entitled Gringolandia, is broadcast every Saturday at 8.30 PM and weeknights at 9.45 with Dave Gleason and Andy Cooksey at the mike.

Thank you for the report and keep listening!

Sincerely yours,

RADIO ECUATORIANA
