

WHITE RIVER VALLEY BROADCASTERS, INC.

OPERATORS OF STATION KBTA
1340KC--MBS
W. R. SMITH, GENERAL MANAGER

BATESVILLE, ARKANSAS

February 10, 1951

Mr. Kermit Geary,
R. F. D. # 2,
Walnutport, Pennsylvania.

Dear Kermit,

Thank you for your kind letter of having heard K B T A during its frequency check on the morning of February 3rd, 1951, between the time of 1:55-2:12 $\frac{1}{2}$ AM.

We are always pleased to know that K B T A is being heard so well at such distances from Batesville!

I'm sure you will forgive us for being so slow in answering your well-received letter of reception; but we have so many of this type that it keeps us pretty busy.

K B T A is R C A-equipped, with exception of a Gates Limiter. The Transmitter is a BTA-250-L, 250 Watt AM, 807 Xtal-Osc., 828 Buffer, PP 810's RF PA, 828's in class "B" as modulators, $\frac{1}{4}$ wave vertical antennae, coaxially-fed. We are affiliated with MBS, AP, Thesaurus library, etc.

Here's lots of luck in the future relative to logging BC stations, to you, Kermit!

I used to log "Ham" stations many years ago, before I, too, became one of them. hi... If you are a "Ham" op, give a listen on 20M or 75M 'fone for W5KKV, which is my call, and I'll be very happy to shoot the breeze with you.

Again thanking you very much for your letter of reception of K B T A, I am

Very Sincerely, (73's)

"Andy"

J. Andrew Wright, W5KKV
Engineer, K B T A, Batesville, Ark.
