Mr. Kermit Geary,
R.F.D. # 2,
Walnutport, Pa.

Dear Mr. Kermit

Thank you for your letter verifying the fact that you received our frequency check transmissions on the morning of December 1, 1953. You can take this letter as my reply and verification of you having received that broadcast on that morning.

I have the National Radio Club to thank for the information that there was a station in Flagstaff (KGPH) operating on the frequency of 690 kc all night. That was something that I thought the FCC did not allow. It also was a check to see if our measuring company in Kansas City could receive us with the interference caused by the Flagstaff station. Lucky for us they can due to the high level of tone modulation we use for these tests

Once again thank you and the radio club for these cards and letters. We do test on the first Tuesday morning of each month at one to one-fifteen A.M. Mountain Standard Time.

Sincerely Yours,

Peter Trowbridge
President
General Manager
Chief Engineer.
