

AUSTRALIAN BROADCASTING COMMISSION

264 PITT STREET,
SYDNEY

REFERENCE... 142:254

G.P.O. BOX 487, SYDNEY

22nd April, 1954

Mr. Kermit Geary,
R.F.D. No.2,
Walnutport,
PENNSYLVANIA U.S.A.

Dear Mr. Geary,

We feel that your report on reception of 2CN Canberra calls for a letter of congratulation as well as a verification card. This transmitter is one of the regional (or relay) stations of the Australian Broadcasting Commission: Canberra, the Federal Capital, has two of them (the other being 2CY), and 2CN is a quite low-powered transmitter, having an aerial power of only 2 kw. Your being able to hear 2CN on March 29th represents, of course, freak rather than conventional reception, because in some directions it is not audible very far beyond the immediate district in which Canberra is situated.

You may be interested in the enclosed lists of medium and short-wave transmitters that radiate the Home Service programmes of the A.B.C. These are, of course, quite distinct from the powerful transmitters of Radio Australia, the Overseas Service.

Thank you for your kind wishes, which we are happy to reciprocate. Perhaps you will be able to hear some of our other stations; if so, please send us a report as detailed as you can.

Yours faithfully,
AUSTRALIAN BROADCASTING COMMISSION

KEITH BARRY

Controller of Programmes
