Your programme details have been checked and were
...*all*.....*OK*

Our mast is of tubular lattice steel, 162ft high and stands on a 10ft concrete pillar. The earth mat consists of 120 wires $\frac{1}{4}$ wave length radiating from base of mast.

WE THANK YOU FOR YOUR REPORT

Many thanks for your report. It was greatly appreciated.

Our town (not city unfortunately) is situated approx. 230 miles north of Sydney & 10 miles in from the coast. Our district is noted for dairying & timber. We are close to many popular tourist resorts. Thanks again
