Dear Sir:

Thank you for your recent report on KHSL signals in Pa. After examining your report I find that it is correct as stated.

KHSL operates with 1000 watts of power with a directional antenna system that is directed North and South. All equipment is R.C.A. and the transmitter is 3 miles East of Chico with studios in the downtown area.

Thanks again for the report.

Very truly,

E. P. Milburn-Chief Engineer
KHSL
Chico, California.
