Mr. Kermit Geary
R.F.D. #2
Walnutport, Penn.

Dear Mr. Geary,

Thank you for your fine report of reception of K S U E on the morning of February 13th. Your report was very complete, and we were glad to know that you were able to hear us so well. It must have been a good morning for DXing, as we also received a report from Reading, Penn., and one from Madison, Wis., for the same date.

This letter will verify your report of reception. KSUE carrier was on starting at 1:30 AM P.S.T., however, so it must have been some other station coming through at 1:20. Our carrier was on from 1:30 to 1:45 AM P.S.T. for a frequency check. Carrier was modulated with band music between announcements of call and location. Our regular Frequency check time is 1:15 to 1:30 AM, on the second Friday morning of each month. However, currently we are operating without a Frequency Monitor, and must have a check each week, 1:30 to 1:45 AM.

We are operating with a composite transmitter working into a 150 Ft. Wincharger tower. Our location in Northeastern California is 4195 ft. elev., on the Eastern slope of the Sierra Nevada Range.

Thanks again for the fine reports and good luck with your DXing in the future.

Very truly yours,

Hal Houston
Hal Houston, C.E.
