Mr. Kermit Geary
R.F.D. No. 2
Walnutport, Pennsylvania

Dear Mr. Geary:

It was with great pleasure we received your letter of April 3rd reporting reception of this station during equipment tests on that morning. This is the most distant report we have received so far and may this letter serve as verification.

KTIM proposes commencement of a regular broadcasting schedule April 28th from which time we will be on the air from sunrise to sunset daily. Our main studios and offices are located in San Rafael, a suburb of San Francisco and some seventeen miles north of that city. The transmitter which is a Raytheon RA-1000 is located at Kentfield some four miles from the studios on the west edge of San Pablo Bay (the north leg of San Francisco Bay). Our Antenna is a 200-foot vertical making it slightly over one-quarter wave in height.

Your air mail stamp which you sent us is inclosed as we consider your service in writing well worth our investment of that amount.

We sincerely thank you for your interest in KTIM and hope that you will be able to hear us frequently in the future.

Yours very truly,

RADIO STATION KTIM
