Dear Sir:

I would like to take this opportunity to thank you and verify your report of our frequency test to Commercial Radio Equipment Company of Kansas City on June 4. Your report corresponds in detail with our station log.

The station is located about one mile south of Trinidad and contains both studio and transmitter. We have all Gates equipment with a 150 foot shunt fed antenna, fed by 121 feet of coaxial.

Thank you again for your very nice letter.
I remain 73's,

Yours very truly,

Chief Engineer.
