Mr Kermitt Geary
R.F.D. #2
Walnutport, Pa.

Dear Kermit:

I sure want to thank you for your complete report of of our frequency check of September 10th. I have received lots of reports, but not kidding, you have the most complete report of any received as to date. It is a plegsure for me to receive a report as this one, as I can have some idea as to what the station is doing. In our regular broadcasting during the day, we are heard over 200 miles distant, which is very good for a 1000 watter.

I had the privlidge of living in Philadelphïa at Green and Manheim for quite sometime. I do like the east.

I am glad to verify your report as correct and hope you hear us again.

Thanking you for all the fine information and wishing you the best of DXing this winter.

Sincerely

Lloyd L. Wilson
Asst. Mgr & Chief Engineer.
