Mr. Kermit E. Geary
R.D. 2, Box 298
Walnutport, Pa.

Dear Mr. Geary:

We received your letter this morning with your report on our equipment tests on the morning of Monday, February 3, 1964, and wish to verify your report.

We had been doing equipment tests, both with and without modulation, from January 26 through February 5 starting at midnight each night. Reception of our signal must have been very good the night of Feb. 3 as we have received numerous letters from the eastern areas of the U.S. It is gratifying to know that our 1000 watts was powerful enough that night to override KFBK.

We passed our FCC inspection yesterday, February 5 and should commence regular broadcast activities on a sunrise to sunset basis on or before Feb. 10 at 1530 kc, 1000 watts with good music programming.

We wish to convey our most grateful appreciation for your letter and to extend an invitation to stop in and see us the next time you are in the area. We would enjoy showing you around.

Sincerely,

William Cook
